FOIL FLEX

LAMINATE FLEXIBLE FOIL DUCT

Check with local building codes before installation.

Product: Laminate Flexible Foil Duct

Description: Non-insulated foil flexible duct reinforced with bead wire.

Construction: Multiple layers of aluminum/polyester laminate and metalized polyester tape are formed into a flexible duct bonded with premium heat-cured fire-retardant adhesive. A bead wire helix supports the duct.

Components:

- Multi-ply design of aluminum/polyester laminate and metalized polyester
- Bright - Non galvanized coated bead wire – 0.035 inch diameter
- UL-approved fire-retardant water-based adhesive

Specifications:

- Duct Diameter: 3 inch - Wire pitch: 1 inch
- Duct Diameter: 4 inch - Wire pitch: 1.25 inch

Properties:

- Operating temperature: -55°F to +250°F °
- Maximum rated operating pressure: Positive – 6 in. WC – Negative 3/4 in. WC
- Maximum Velocity: 5,000 fpm
- Max Flame Spread Index: Less than 25
- Max Smoke Developed Index: Less than 50
- Resists tearing and puncturing
